

## ***RoHS Compliance Letter***

November 1, 2006

Aurora Circuits, LLC, offers printed circuit boards compliant with Directive 2002/95/EC of the European parliament and of the council of 27 January 2003 on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment. (Provided that a lead-free surface finish is requested.)

Article 4 of the Directive reads as follows:

“Member States shall ensure that, from 1 July 2006, new electrical and electronic equipment put on the market does not contain lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE). National measures restricting or prohibiting the use of these substances in electrical and electronic equipment which were adopted in line with Community legislation before the adoption of this Directive may be maintained until 1 July 2006.”

This letter certifies to the best of our knowledge that all our printed circuit boards, (with a surface other than tin-lead solder) comply with RoHS directive. We have certification statements/declarations from our suppliers, which state that none of the restricted items listed above are contained in any of our raw materials.

Sincerely,

Dave Zeno  
President  
Aurora Circuits, LLC.
